City Council Agenda Communication

Meeting Date: August 9, 2011
Subject: 12th Street, Fir to 89A
Department: Engineering
From: Troy Odell PE
Morgan Scott

REQUESTED ACTION

Provide direction regarding the addition of a multi-use path on 12th St from Fir Street to SR 89A.

BACKGROUND

At a previous City Council work session Council directed staff to provide more information regarding the installation of a multi-use path on 12th Street and removing the bike lanes from the roadway to the multi-use path. An image of the proposed roadway and cost estimate will be provided at the council meeting.

It is important to point out that the vehicle travel lanes on 12th street would not be narrowed, but rather would widen from 11.5' to 14'. Gutter pans will not be installed with the project which will result in a total 28' wide paved section. There would no longer be a bike lane between the outer white stripe and the gutter pan.

Council may also consider installing 'sharrows' on the road to remind drivers that serious bicyclists have the right to remain in the roadway. However, recreational bicyclists will be able to safely navigate on the path. A picture of a sharrow can be found in Appendix A.

JUSTIFICATION/BENEFITS/ISSUES

Removing the bike lanes from the roadway will not only create a roadway which encourages slower traffic, but will also save the city the substantial cost of purchasing additional right-of-way and relocating utility lines. Removing the bike lanes from the roadway will allow serious

bicyclist to move alongside slower moving traffic and will allow recreational bicyclist a pathway detached from the roadway. This proposal will reduce the overall cost of the 12th Street project because less asphalt will be used and the narrow road coupled with the meandering path will allow many utilities to be left in place.

If the road section is not narrowed, public utility easements will need to be purchased and many of the existing utilities will need to be relocated outside of the existing right-of-way.

Some pedestrian easements may need to be purchased for the construction of the meandering sidewalk.

COST/FUNDING SOURCE

Capital projects fund

For Our City Strategy and Tactics

- 1) Passion and Vision of Mayor for people
- 2) Network Leaders
- 3) Network Organizations
- 4) Engage with the Community
- 5) Empower through Mobilization
 - a) Emergency Preparedness
 - b) Community Collaboration
 - c) Volunteerism

Serve the City

CARE INC is a civic nonprofit organization, not “faith based.” Due to this, For Our City is always focused on the community, not just the faith based part. However, CARE INC does recognize that the greatest potential of service in the community is the people of faith
