

Building Healthy Places

Free Workshop

The Community Plan Collaborative is pleased to invite you to participate in a **free *Building Healthy Places Workshop*** to learn more about the link between human health and development as a core component of advancing thriving communities. This workshop will showcase valuable strategies, resources, and best practices to inspire new ways of thinking about how the planning and design of our communities directly support the health of our citizenry.

Community Plan is a groundbreaking partnership of eight statewide agencies engaging in educational activities to support local and regional public officials' decision-making around important community issues.

This FREE interactive Building Healthy Places Workshop seeks participation from municipal and county entities throughout the region - all elected and appointed public officials, land use planners, economic, community development, and transportation professionals, and health specialists interested in gaining proactive strategies for cities, towns, and counties to use in ensuring the way we plan and design our communities will support healthy lifestyles for our residents now, and for future generations.

BUILDING HEALTHY PLACES *Free* WORKSHOP
