Rainwater Harvesting Workshop

Learn about rainwater harvesting on **Saturday, June 9th, 2012 from 9:00am-12:00pm** in the Cottonwood Room at the Cottonwood Recreation Center, 150 S. 6th Street, Cottonwood, AZ. There will be three presentations to help you learn the basics of designing both passive and active rainwater harvesting systems. You'll be able to calculate rainwater yields and size your collection system accordingly. Learn about soil and plant considerations when using rainwater on your landscape. Policies, rebates and other considerations will also be discussed. Lunch will be on your own. We will reconvene in the afternoon from **1:30-4:00pm** to start our **tour of several local demonstration sites**. Chris Anderson will be leading the site visits. Carpooling is encouraged.

Presenters will include Jeff Schalau, Mark DiLucido and Edessa Carr, University of Arizona Cooperative Extension staff. The program is free and participants will take away numerous free resources. Please pre-register for this workshop by calling Pam Denney, U of A Cooperative Extension, 928-445-6590 ext.221.
