New Pumper on Display at Technology & Equipment Expo

Our new CAFS equipped fire pumper was recently displayed at the Technology & Equipment Expo held in conjunction with the Desert Southwest Fire & EMS Leadership Conference. The expo was held in the University of Phoenix Stadium in Glendale, AZ. This year's conference was an inaugural event sponsored by the Arizona Fire Chief's Association. Our new fire pumper was displayed in the Rosenbauer booth and represents the latest in firefighting technology including a "compressed air foam system" and "state of the art" emissions control systems. The acquisition of this new pumper is reflective of the commitment of the Cottonwood City Council and City of Cottonwood staff to ensuring that the Cottonwood Fire Department has the most modern, efficient and capable firefighting equipment and personnel to serve the citizens of our community.

Attending the conference and expo from the Cottonwood Fire Department and pictured with our truck (left to right) are Lieutenant Jeff Boyd, Fire Chief Mike Kuykendall, former Fire Chief Mike Casson and Captain Tim Wills.

For further information please contact the Cottonwood Fire Department at 928-634-2741.
