Cottonwood Fire Department Smoke Detector Program

The Cottonwood Fire Department’s ongoing “Smoke Detector program” recently targeted the Rio Del Oro Mobile Home Park located at 325 W. Hwy 89A. On Nov 21st Cottonwood Fire Department shift personnel along with Fire Marshal Rick Contreras and Fire Inspector Steve Trautman canvassed 87 homes at the El Rio Del Oro Mobile Home senior living community. Fire Department personnel installed smoke detectors in 35 homes and distributed an additional 5 detectors to residents within the community who desired to install the detectors themselves.

Our goal for this program is to find areas of the city having the greatest need for smoke detector installation and then provide and, if requested, install new or additional smoke detectors to ensure that the residents are properly protected in their homes. The smoke detectors installed or distributed to El Rio Del Oro residents were graciously provided to the Cottonwood Fire Department by the Camp Verde Fire District who had received the smoke detectors in a grant. This program is part of Cottonwood Fire Department’s ongoing commitment to finding meaningful ways to promote fire and life safety in our community.

For further information concerning this program please contact the Cottonwood Fire Department at 928-634-2741.
