Formulary Drug Removals

Attached as a separate document is a list of medicines by drug class that will be removed from your plan's formulary.

This list is effective January 1, 2017.

If you continue using one of the drugs identified as a "Formulary Drug Removal," you may be required to pay the full cost. If you are currently using one of the Formulary Drug Removal medications, please ask your doctor to choose one of the generic or brand formulary options provided in the attachment.

**If you have any questions, please call CVS customer care:
 (855) 248-3447**

3 Easy Ways to Lower Your Drug Costs

Save up to 85% with generics: Choose generic drugs when possible. Many generics cost 80 to 85 percent less than brand name drugs. If you are concerned about the quality or effectiveness of generics, talk to your doctor or visit www.fda.gov to learn more.

Use the 90-day mail order program for long-term prescriptions: If you order a 90-day supply of your medication(s) through the mail, you may save money when compared to the cost of three monthly drug refills. (Note: the amount saved varies based on your Rx benefits. Review your health plan for details.) It takes about 10-14 days to get your order by mail once your order is received. Refill orders take about 7-10 days.

Beware of the hidden costs of "Free": Read the fine print before using manufacturer coupons or free samples. Drug companies hope that discounts will make a patient loyal to a

particular brand so they won't switch to a generic. In addition, most coupons or offers can only be used for a short time; in some cases, they are good for only one use. Once an offer ends, patients with long-term health issues face higher co-pays for these brand name drugs.

Save more money in the long run. Speak with your doctor about generics before you try a limited-time offer on a brand name drug. *Courtesy of BCBS of Arizona*

Category * Drug Class	Formulary Options
Autoimmune and Hepatitis C *	For Autoimmune and Hepatitis C, CVS Caremark will be implementing an Indication Based Formulary for 2017 which may result in additional exclusions announced in both classes.
Generics	Limited source generics may be evaluated when appropriate and potentially excluded.
Hyperinflation	Products with significant cost inflation throughout the year may be evaluated and potentially excluded.
New-to-Market Agents ⁴	New-to-market products and new variations of products already in the marketplace will not be added to the formulary until the product has been evaluated, determined to be clinically appropriate and cost-effective, and approved by the CVS Caremark® Pharmacy and Therapeutics Committee (or other appropriate reviewing body).
Specialty	As new specialty products launch, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially excluded, added back to formulary or not listed.

The listed formulary options are subject to change.
