KEEPING HOLIDAY STRESS AT BAY

Some people look forward to the holidays all year, while others see the holiday season approaching and are overcome by a sense of dread. Will life become so hectic that I can't enjoy the holidays?

How will I buy what I need to buy and not overspend again this year? How will I ever get everything done that I need to do? How many pounds will I gain this year? Will the family get along? The list

could go on and on, but all these questions, if left unaddressed, lead to the same thing: stress! Try these tips for managing the stress that seems to be built into the holiday season:

- Set priorities
- Make a plan
- Keep expectations realistic
- Make a budget and keep it
- Care your yourself and your family

Rest, relax,
and reflect on
the meaning
of the season,
peace!

Important: Formulary Drug Removals

Attached as a separate document is a list of medicines by drug class that will be removed from your plan's formulary.

This list is effective January 1, 2018.

If you continue using one of the drugs identified as a "Formulary Drug Removal," you may be required to pay the full cost. If you are currently using one of the Formulary Drug Removal medications, please ask your doctor to choose one of the generic or brand formulary options provided in the attachment.

If you have any questions, please call CVS customer care: (855) 248-3447

Happy Healthy Holidays

In today's dynamic marketplace, effective formulary management continues to be the cornerstone of cost containment.

On August 1, we announced our 2018 Standard Control Formulary, which included several key, targeted changes to help payors better manage costs, while ensuring plan member access to clinically appropriate therapy. To further manage costs for specialty medications, your plan has also adopted the Advanced Control Specialty Formulary™.

Today we are providing details about additional changes to several high impact therapy classes including autoimmune conditions and hepatitis C. In addition, we are providing new additions to our hyperinflation list, which will be effective January 1, 2018.

The changes to autoimmune and hepatitis C agents expand member access to preferred drugs and provide greater choice for prescribers.

Autoimmune

Autoimmune agents are used to treat conditions such as rheumatoid arthritis, ulcerative colitis, psoriasis, and Crohn's disease.

This is a dynamic therapy class with multiple new drugs coming to market. Autoimmune agents were the highest specialty trend driver inclusive of rebates in the first quarter of 2017.*

Given the high launch price, year-over-year inflation and significant trend impact of these drugs, careful management that balances patient access with cost control is critical. Our formulary placement and removal decisions for autoimmune agents are based on extensive member and prescriber experience with comparable moves across other formularies.

In addition, existing drugs are increasingly obtaining multiple supplemental indications, and the cost is the same regardless of the drugs' efficacy in treating different conditions.

In 2017, Autoimmune Agents:

- Are the **#1 driver** of specialty drug trend*
- Account for **five of the top 20** brand drug drivers of trend*
- Are expected to be **the fastest growing drug class** over the next five years¹

Effective January 1, 2018, our 2018 Advanced Control Specialty Formulary expands the indication-based approach, launched last year for psoriasis, to offer a more precise management strategy across this rapidly growing therapy class. An indication-based approach manages utilization for specific drugs used to treat particular diagnoses or conditions – and the value it delivers to an individual patient – rather than managing formulary placement at a therapy class level. Members will continue to have access to numerous preferred drug options and our clinical approach also provides continued access, when appropriate, for members currently on a given therapy.

2018 Advanced Control Specialty Formulary Changes: Autoimmune Agents

Indication	2017 Formulary Preferred Agents	2018 Formulary Preferred Agents	2018 Formulary Removals [†]
Ankylosing Spondylitis	Enbrel, Humira	Cosentyx, Enbrel, Humira	Cimzia, Simponi
Crohn's Disease	Humira	Cimzia [‡] , Humira	Entyvio, Stelara
Psoriasis	Humira, Stelara, Taltz	Humira, Stelara [‡] , Taltz [‡]	Cosentyx, Enbrel, Otezla
Psoriatic Arthritis	Enbrel, Humira	Cosentyx, Enbrel, Humira, Otezla	Cimzia, Orencia SC & IV/Orencia ClickJect, Simponi, Stelara
Rheumatoid Arthritis	Enbrel, Humira	Enbrel, Humira, Kevzara, Orencia/Orencia ClickJect (SubQ)	Actemra, Cimzia, Kineret, Orencia IV, Simponi, Xeljanz/XR
Ulcerative Colitis	Humira	Humira, Simponi [‡]	Entyvio
All Other	Enbrel, Humira	Enbrel, Humira	Actemra, Kineret, Orencia SC & IV/Orencia ClickJect

[†] Other drugs in the auto-immune class that are not FDA-approved for the given indication would also not be covered.

[‡] After failure of Humira.

Hepatitis C

Our 2018 formulary strategy for hepatitis C is consistent with our current approach and maintains member access to several preferred therapies. Members will have expanded access to preferred hepatitis C drugs with the addition of Vosevi, which has recently been approved for previous treatment failures. Vosevi will be available as a preferred option October 1, 2017.

Hyperinflation

Although price inflation has moderated slightly, brand inflation continues to be the biggest driver of trend. Brand inflation contributed a 7.5 percentage point increase to trend for our commercial book of business in the first half of 2017.² In addition to the cost increases seen in most drugs, some branded medications see extreme – even triple-digit – price surges. In 2017, we implemented a hyperinflation management component to our Standard Control Formulary to help address such significant price inflation and help control costs for clients and their members. To date, this strategy resulted in 29 drugs being removed from our Standard Control Formulary.

We monitor and review hyperinflationary drugs and implement formulary changes on a quarterly basis to minimize the cost impact of these drugs.

Effective January 1, 2018, the following drugs will be removed from our formulary under our hyperinflation criteria**:

- Primlev (241.1% inflation)
- Sprix (796.5% inflation)
- Stendra (156.6% inflation)

Formulary management is a critical component of cost management in the rapidly evolving pharmaceutical marketplace, and we remain committed to continually innovating our strategy to help reduce pharmacy costs for clients and members, while ensuring clinical integrity and access. We remove drugs only when clinically appropriate, lower-cost (often generic) alternatives are available.

Your CVS Health Account Team will be contacting you to discuss our 2018 formulary strategy and provide more information about our range of formulary innovations.

*Based on CVS Caremark commercial book-of-business data

**Hyperinflation percentages reflect three year inflation rates

Performance Drug List - Standard Control for Clients with Advanced Control Specialty Formulary™

The **CVS Caremark® Performance Drug List - Standard Control for Clients with Advanced Control Specialty Formulary™** is a guide within select therapeutic categories for clients, plan members and health care providers. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medicines are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only. This is not an all-inclusive list. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*.

PLAN MEMBER

Your benefit plan provides you with a prescription benefit program administered by CVS Caremark. Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list along when you or a covered family member sees a doctor.

Please note:

- Your specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the U.S. Food and Drug Administration (FDA) may not be covered upon release to the market.
- You may be responsible for the full cost of non-formulary products that are removed from coverage.
- For specific information regarding your prescription benefit coverage and copay¹ information, please visit www.caremark.com or contact a CVS Caremark Customer Care representative.
- CVS Caremark may contact your doctor after receiving your prescription to request consideration of a drug list product or generic equivalent. This may result in your doctor prescribing, when medically appropriate, a different brand-name product or generic equivalent in place of your original prescription.
- In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product to the market.

HEALTH CARE PROVIDER

Your patient is covered under a prescription benefit plan administered by CVS Caremark. As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name on this list.

Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. The member's specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the FDA may not be covered upon release to the market.
- The member's prescription benefit plan may have a different copay¹ for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.
- Log in to www.caremark.com to check coverage and copay¹ information for a specific medicine.

You may be responsible for the full cost of certain non-formulary products that are removed from coverage. Please check with your plan sponsor for more information.

FOR YOUR INFORMATION: Generics should be considered the first line of prescribing. This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval. In most instances, a brand-name drug for which a generic product becomes available will be designated as a non-preferred option upon release of the generic product to the market. Specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. The member's prescription benefit plan may have a different copay¹ for specific products on the list. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Generics listed in therapeutic categories are for representational purposes only. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Log in to www.caremark.com to check coverage and copay¹ information for a specific medicine.

An exception process may exist for specific clinical or regulatory circumstances that may require coverage of an excluded medication.

* The preferred options in this list are a broad representation within therapeutic categories of available treatment options and do not necessarily represent clinical equivalency.

§ Generics are available in this class and should be considered the first line of prescribing.

¹ Copayment, copay or coinsurance means the amount a member is required to pay for a prescription in accordance with a Plan, which may be a deductible, a percentage of the prescription price, a fixed amount or other charge, with the balance, if any, paid by a Plan.

² Listing does not include generic CARDIZEM LA.

³ A ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-800-588-4456.

⁴ ONETOUCH brand test strips are the only preferred options.

⁵ BD ULTRAFINE syringes and needles are the only preferred options.

⁶ Listing reflects the authorized generics for TESTIM and VOGELXO.

Plan member privacy is important to us. Our employees are trained regarding the appropriate way to handle members' private health information.

CVS Caremark may receive rebates, discounts and service fees from pharmaceutical manufacturers for certain listed products. This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with CVS Caremark. Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.
